Post Op Cares for Punch Biopsy

- Please keep the site clean & dry for a minimum **24 hours**
- The site will probably have at least 1 stitch. The nurse will have used a brown steri strip tape & possibly a white dressing. After 24 hours remove the white dressing only, leaving the steri strip in place.
- If you have any increase in pain, redness or inflammation, please contact Bay Skin Cancer
- You will have an appointment for 7 days to have the stitch removed.
- **We can not offer a walk in service** but if you have any concerns please phone & a nurse will return your call
- You will be notified when the Lab results are available, this may take up to 14 days. If you haven't heard by then, please call Bay Skin Cancer Clinic.

Please update contact & NoK details with our reception staff
